Software Developer (Java + React)

Front-End & Java Developer with 3 years of experience building responsive web apps using React.js, Tailwind CSS, and Java. Skilled in creating interactive UIs, UI validations, and optimizing user experiences. Proficient in JavaScript, with backend expertise in Java API development and Oracle SQL. Seeking to contribute to innovative web solutions in a collaborative team.

SKILLS

Front-End: React, JavaScript, HTML, Bootstrap, CSS, Tailwind CSS, Responsive Design

Back-End: Java, Oracle SQL, Node.js

Tools: Git, JIRA Admin, Confluence, Oracle BI Publisher

WORK EXPERIENCE

Equitas Small Finance Bank

Software Developer • Full-time   **Chennai • June 2022 - Present**

- Led front-end development using NEWGEN Process Designer, JavaScript, and SQL to enhance UI, streamline workflows, validations, and document handling, resulting in a 20% boost in data accuracy.
- Developed 70+ audit reports using complex SQL queries in Oracle SQL Developer, enhancing case verification for CPC, Credit, and Business teams and minimizing issues by 30%
- Managed and executed production deployments, reducing deployment time by 20% and ensuring smooth implementation of enhancements and bug fixes with minimal post-release issues.
- Collaborated with stakeholders to gather and document requirements, aligning development with business goals and accelerating project delivery by 20%.
- Efficiently triaged and resolved support team issues, prioritising critical tasks to improve turnaround time by 30%, enhancing response speed and team productivity, and ensuring minimal operational disruption.
- Designed and implemented SQL functions and POST APIs to Oracle BI Publisher for efficient data extraction and report generation, reducing overall document generation time by 20%.
- **Administered JIRA, managing projects, custom workflows, fields, and user permissions. Optimized setup and tracking processes, enhancing project efficiency by 25%.**

High Radius

Product Trainee • Internship   **Remote • August 2021 - January 2022**

- Implemented a responsive, user-centric front-end for a B2B Invoice Management App using HTML, CSS, and JavaScript, collaborating remotely with cross-functional teams.

PEROSNAL PROJECTS

V Mart – Discount Product Showcase (React + Google Sheets)

Created a responsive React app for V Mart to display discount products using real-time Google Sheets data. Optimized load speed by 25% through CSV parsing, image handling, and Tailwind CSS UI. Integrated Google Maps for store locations and deployed on Vercel for public access.
Website Link : ***https://v-mart-website.vercel.app/***

Text Utils

Built a responsive React web app, Text Utils, offering text manipulation tools with a user-friendly interface and ensuring smooth functionality across all screen sizes.
